

## CLG Microarray Test Results

**Cell Line ID:** SYNJ1 A5-1 p30    **Lab #:** CLG-47706    **Date received:** 9/23/22    **Date Reported:** 10/18/22

**Contact Person:** Hanqin Li    **PI:** Dirk Hockemeyer    **Institute:** University of California Berkeley

**Test Code:** aCGH 100

**Email:** [REDACTED]

**PO #:** [REDACTED]

**Mailing Address:** [REDACTED]

**Sample Type:** Human ESC Frozen Cells

**dsDNA Concentration:** 336 ng/μl

**Total dsDNA:** 3.5 μg

**Sex:** Female    **260/280** (1.7-1.9): 1.87

**260/230** (≥1.0): 2.29

**Array Type:** Agilent 60K Standard aCGH

**Array ID Number:** 252192456393\_2\_1

**Human Assembly:** hg38

**Reference DNA:** Agilent Euro Female

### Quality Control

A sufficient amount of high quality genomic DNA, as determined by UV spec. (Nanodrop), fluorometer (Qubit) and Agarose Gel analysis, was extracted from cell line SYNJ1 A5-1 p30 and passed our internal quality standards for aCGH labeling.

aCGH Probes (PASS/FAIL): Pass

Experimental Deviations: None

### Results:

Microarray analysis did not detect any amplifications or deletions.
