## **Certificate of Analysis (CoA) for induced Pluripotent Stem Cells**

This product is for research only

| Reprogramming Method         | Sendai CytoTune <sup>™</sup> 1.0 (OCT3/4, SOX2, cMYC, and KLF4)   |                                   |                                      |
|------------------------------|---|-----------------------------------|--------------------------------------|
| Passage Number               | Passage 22  | Cell number / vial                | 1,5x10E6                             |
| Culture Matrix               | Matrigel™   | Culture Medium                    | mTeSR <sup>™</sup> -1                |
| O <sub>2</sub> Concentration | 21%   | CO <sub>2</sub> Concentration     | 5%                                   |
| Passaging Method             | EDTA  | Additional Culture<br>Information | Rho kinase inhibitor<br>used at thaw |
| Cryopreservation Medium      | Cryostor CS10   |                                   |                                      |
| Recommendation for thawing   | Recommended thaw into 60mm plate(s) Refer to cell line user protocols for further guidance at www.EBiSC.org |                                   |                                      |
| Additional Comments          | Typical recovery after thaw, typical growth to confluency   |                                   |                                      |

Please see <a href="https://cells.ebisc.org/">https://cells.ebisc.org/</a> for further information on Quality Control and characterisation applied to lines released by EBiSC. The following standard testing criteria have been determined within EBiSC, prior to release of this product:

| Test               | Assay  | Acceptance Criteria  | Result   |
|--------------------|--|--|--|
| Sterility          | Inoculation for microbiological growth                 | Not Detected   | Pass   |
|                    | Mycoplasma   | Not Detected   | Pass   |
|                    | Virology<br>(HBV, HCV, HIV1) &<br>(HIV2)               | Not Detected   | Pass by depositor &<br>Pass  |
| Cell Line Identity | STR / Fingerprinting                                   | 85% match to donor<br>Sex match to donor                               | Allele data recorded and available upon request. First profile recorded, Sex match to donor. |
| Viability          | Visual Assessment                                      | Growth to confluence post-thaw   | Acceptable   |
| Phenotype          | Continuous visual assessment of iPSC colony morphology | Recorded   | Typical PSC colonies with low differentiation levels   |
|                    | Flow Cytometry   | SSEA-4 > 70% +<br>TRA-1-60 > 70% +<br>SSEA-1 < 10% +<br>POU5F1 > 70% + | Pass   |
