# CERTIFICATE

This is to certify that the **human embryonic stem cell line (W Ae009-A-Q)** has been registered in the European Human Pluripotent Stem Cell Registry (hPSCreg®):  
<https://hpscrag.eu/cell-line/WAe009-A-Q>

Type of cell line  
hPSCreg® ID  
Other name(s)  
Generating institution

Human embryonic stem cell  
W Ae009-A-Q

Derivation country  
Derivation date  
Associated disease  
Evidence of pluripotency  
Evidence for ethical provenance provided

St. Anna Kinderkrebsforschung  
GmbH  
Austria  
Unknown  
No  
Yes  
Yes

**This certificate should not be shared without explicit authorization of hPSCreg.**

## The registered information provides evidence that:

- the ethical provenance of the above mentioned cell line has been established and complies to the rules set by the European Commission for funding of research with human pluripotent stem cells.
- the donation of biological material was not influenced by undue pressure.
