

Section (i) Test Details

Test Material: ICB preMCB MCB WCB
 Pre-Freeze Viability Level II Other
 SCDF ID/ Description:
 Test Scheduled, include WI reference:
 Sample Received and Test Initiation: Sign Print Date

Section (ii) Results Summary

Comments / Results:
 Complete as a summary if results are attached as separate pages, detail electronic location of supporting documents, changes in test procedure, deviations etc. Internal Job/ Sample Ref. No.
 SSEA1 was expressed only around the edge of the colony on many of the colonies. However several colonies showed some SSEA1 expression throughout the colony. These tended to be smaller colonies.
 There was good SSEA3 expression, it was clearly visible throughout the majority of colonies.
 Tra-1-B1 expression was good, it was clearly expressed throughout the majority of colonies.

 Job Title

Note: On completion the original of this form along with any attachments **must** be returned to QC.

Section (iii) To be completed by QC

OUTCOME: (Within/ Outside Specification or For Information Only)
 Comments or Further Actions: (Note: if outside specification refer to event number.)

Reviewed By Date

Note: On completion of this report the results from multiple tests must be compiled by the Quality Manager onto an FQC.00.C style form as appropriate.
