

Cell line name	BIHi330-A
Bank ID	MB01
Passage No.	10
Date of testing	26.06.2026
Protocol	7.03.0 Validation of pluripotency capacity by Trilineage differentiation with Miltenyi kit

Method

The Test was performed regarding the StemMACS Trilineage Differentiation Kit, human (MACS Miltenyi Biotec, Cat-No. 130-115-660). The 7-day assay enables direct differentiation of pluripotent stem cells into ecto-, meso and endoderm. The resulting cell population was measured by FACS analysis.

Result

20260626 Trilineage with BIHi330-A MB01 p10 mesoderm differentiation with Miltenyi kit

20260626 Trilineage with BIHi330-A MB01 p10 endoderm differentiation with Miltenyi kit

20260626 Trilineage with BIHi330-A MB01 p10 ectoderm differentiation with Miltenyi kit

Conclusion

The cell line shows potency to differentiate into mesoderm, ectoderm and endoderm lineages. The lineage markers CD140b, CD144 (Mesoderm), Sox2, Pax6 (Ectoderm) and Sox17, CD184 (Endoderm) showed positive FACS results.
