CERTIFICATE

This is to certify that the **human embryonic stem cell line (WAe001-A)** has been registered in the European Human Pluripotent Stem Cell Registry (hPSCreg®):

<https://hpscereg.eu/cell-line/WAe001-A>

| | |
|------------------------------------------|-----------------------------------------------------|
| Type of cell line | Human embryonic stem cell |
| hPSCreg® ID | WAe001-A |
| Other name(s) | WA01, H1 |
| Generating institution | WiCell Research Institute - National Stem Cell Bank |
| Derivation country | United States |
| Derivation date | 1998-01-01 |
| Associated disease | No |
| Evidence of pluripotency | Yes |
| Evidence for ethical provenance provided | Yes |

The registered information provides evidence that:

- the ethical provenance of the above mentioned cell line has been established and complies to the rules set by the European Commission for funding of research with human pluripotent stem cells.
- the donation of biological material was not influenced by undue pressure.
