CERTIFICATE

This is to certify that the **human embryonic stem cell line (RUESe001-A)** has been registered in the European Human Pluripotent Stem Cell Registry (hPSCreg®):
<https://hpscereg.eu/cell-line/RUESe001-A>

Type of cell line	Human embryonic stem cell
hPSCreg® ID	RUESe001-A
Other name(s)	RUES1
Generating institution	The Rockefeller University - Laboratory of Molecular Embryology
Derivation country	United States
Derivation date	2004-08-30
Associated disease	No
Evidence of pluripotency	Yes
Evidence for ethical provenance provided	Yes

The registered information provides evidence that:

- the ethical provenance of the above mentioned cell line has been established and complies to the rules set by the European Commission for funding of research with human pluripotent stem cells.
- the donation of biological material was not influenced by undue pressure.
