

## Certificate

This is to certify that the **human induced pluripotent stem cell line (LUEi012-A)** has been registered in the European Human Pluripotent Stem Cell Registry (hPSCreg):

<https://hpscereg.eu/cell-line/LUEi012-A>

|   |   |                                     |
|---|---|-------------------------------------|
| <input type="checkbox"/> Type cell line                           | : | Human induced pluripotent stem cell |
| <input type="checkbox"/> hPSCreg name                             | : | LUEi012-A                           |
| <input type="checkbox"/> Other name                               | : | iPS-L-2131                          |
| <input type="checkbox"/> Provider                                 | : | Institute of Neurogenetics          |
| <input type="checkbox"/> Country                                  | : | Unknown                             |
| <input type="checkbox"/> Disease                                  | : | No                                  |
| <input type="checkbox"/> Evidence of Pluripotency                 | : | Yes                                 |
| <input type="checkbox"/> Evidence for Ethical Provenance provided | : | Yes                                 |

The registered information provides evidence that:

- The line has been derived with full informed consent of the donor
- No undue inducement has been provided for donation
